# HONDA CROME PRO

ECU TUNER HA MOTORSPORTS ECU TUNER ODB1 ECU TUNER PULSARE... While using CROME PRO, what's the deal with.. Highly recommend for the price and quality. From another user.. It's a great product for the price. The manual is decent, but a lot of the features don't work. I read other reviews and the \$150 for a tune seems a little expensive. I would expect better performance at that price. Just from being. 100% Crome Pro. The only option is to remove the BEC wire. No more HPRAC. Extremely happy. Quick and easy to use. Many thanks! I've been using Crome for years. They've improved in the last few years. I'm currently using the K Tuner ECU Injection Kit plus Crome Pro version 5.2.0. Customer Service is top-notch. Fantastic Product and Customer Service. I recommend this to anyone.. Crome just keeps getting better. I'm using the latest version and it is. Way to go Crome! Simply the best I have used. Crome Pro. Price and Customer Service. First off, I am a Honda fanboy and in my car it is the stock ecu. I have tried many different tuning/ECU programs.. Crome is by far the best. Simple to use, no learning curve, excellent customer support, and I was able to utilize features that other. My only suggestion is to work on a better manual, somewhat hard to understand. However, I am a non-engineer and can understand enough to follow the instructions. Crome is the best ECU tuner you can get for your Honda. It works and it works well! I am using the "Chip " tune on my 06 accord and I have. This tune is by far the best one I've used. Many thanks to crome. I highly recommend this software to any professional tuner with. Amazing product. I'm using version 5.0.0 on a 2005 Civic DX. I'm impressed how well this program works. It's a little pricey compared to most programs available. I have been using Crome Pro for years on all Honda vehicles and have had nothing but success in performance tuning and. Love them. Had them on my 2015 in

0.3.0.P28/72 - please make a boot image for your rom with the original rom it came with. See here for information how to do it. This part is designed for boosting the power of the stock.

Welcome to the Crome Forum! To submit a product for.Q: Sum of the series of  $2n + 1$  How to prove that the sum of the series is  $-\frac{2}{3}^n$ , without Riemann Zeta function?  $\frac{1}{3}$

$\sum_{n=0}^{\infty} \frac{(2n+1)}{3^n} = -\frac{2}{3}$   $\frac{1}{3}$  A: I think, in this case, it's easier to use the negative binomial theorem:  $\frac{1}{(2n+1)3^n} = \frac{1}{(2n)3^n + 3^n} = \frac{1}{(2n)(3^n+1)+1} = \frac{(3^n+1)^{-1}}{(2n)(3^n+1)} = \frac{1}{2} \frac{1}{(3^n+1)^{-1}} \sum_{k=0}^n \binom{n}{k} \frac{1}{3^k}$  The last sum equals

$\frac{1}{3} \left( \frac{1}{1+\frac{1}{3}} \right)^n = \frac{1}{3}$

Racing Manta seaplanes, new suv electric Honda Indy, Brake more, F1 Car, Grand Prix.

1. Field of the Invention The present invention relates to a shift register, and more particularly, to a shift register for driving light emitting diodes (LED). 2. Description of the Prior Art Please refer to FIG. 1. FIG. 1 is a schematic diagram showing a prior art shift register 10 for driving a plurality of LEDs D. The shift register 10 includes a plurality of flip-flops 11, a NAND gate 12, a bootstrap capacitor 13 and a plurality of NMOS transistors 14, 15. Each of the flip-flops 11 receives a first clock signal C1 and a second clock signal C2, and outputs an output signal OUT1, OUT2 or OUT3 to the gate of the NMOS transistor 14. Each of the flip-flops 11 outputs an output signal OUT1, OUT2, OUT3 or OUT4 to the gate of the NMOS transistor 15. The NAND gate 12 generates an enable signal E to control the turn-on or turn-off of the NMOS transistors 14 and 15. The bootstrap capacitor 13 receives a supply voltage VDD and outputs an output voltage Vbootstrap to the gates of the NMOS transistors 14 and 15. Each of the flip-flops 11 includes a pull-up transistor (hereinafter "PU transistor") 111, a holding transistor (hereinafter "HT transistor") 112 and a pull-down transistor (
